

## **System Alignment Taskforce Scope of Work**

### **Areas of Initial Focus**

The initial work of the taskforce will focus upon those issues that are currently under the purview of the Governor and that would potentially require legislative actions to complete. The overarching goal is to streamline service delivery and governance of programs that provide services to Hoosier citizens and businesses and focus upon the development of occupational skills and knowledge and/or job placement activities. Streamlining services and consolidation of programs should result in the elimination/reduction of duplicative services and lead to greater efficiencies and outcomes for the groups served.
